

TRELLIDOR™
THE ULTIMATE CRIME BARRIER

SOUTH AFRICA'S FAVOURITE SECURITY BARRIERS

For over thirty years Trellidor has manufactured distinctive trellis-style security grilles to help protect homes, offices and commercial buildings from unwanted intruders. Today we have a product range to suit all requirements and all levels of risk profile, from low to extremely high.

Our products can be designed to fit doors, windows, patios, passages, stairs and other openings. An individually tailored security solution may require a selection of units from different ranges, all of which work together to help keep you safe.

Trellidor security barriers are either fully or partially framed for increased resistance to attack. We custom measure and manufacture every barrier we make for best-fit and Trellidor technicians install them. Our products are manufactured from a range of materials including aluminium and galvanised steel, powder coated in standard or non-standard colours.

All our security products are manufactured at our ISO audited factory and are SABS approved. If properly maintained, they are guaranteed in terms of quality and corrosion resistance, even in coastal regions. Ask your Trellidor Consultant to explain how to maintain your Trellidor products to ensure the validity of the full guarantee.

Trellidor Retractable Security

Trellidor Retractable Security barriers have a neat, compact sash uniquely designed for improved strength and smooth operation. They are fully framed, another strengthening feature, and have a choice of Trellidor's patented locking systems.

The product options include a retractable barrier that has been internationally certified to level 2 for its ability to resist attack by the London-based LPCB (Loss Prevention Certification Board).

Trellidor Retractable Security gates are used in both domestic homes and commercial applications such as banks, prisons, retail outlets, airports, schools and stadiums.

Our retractable security barriers are also recommended for windows, especially those designated as alternative escape routes in the event of fire or a hostage situation, because your security barriers should help to protect you, not trap you inside the building.

Trellidor Fixed Security

This is Trellidor's range of non-retractable security barriers, custom-made to help protect windows of any type, open balconies, glassed walls and glassed-in stairways amongst others. They are fully framed and there is a product suitable for all levels of vulnerability to break-ins, from low to extremely high.

Trellidor Fixed Security designs can be made to match Trellidor Retractable Security gates, so there is no mismatching of barrier styles and no jarring on the eye. We offer other choices of style too, including an attractive custom made burglar guard with practical oval-shaped uprights, available in four design options.

Our fixed security barriers can be manufactured to fit almost any sized opening, from large to very small. They can be fitted internally or externally, face-on or in the reveal. They are suitable for both home and commercial applications.

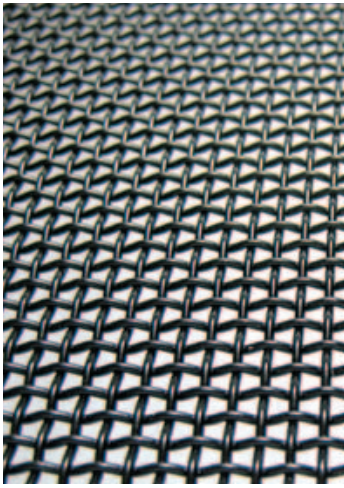

Trellidor Cottage Guard

Trellidor Cottage Guard is our premium quality, fully framed burglar guard that is suitable for any window style. They are custom measured and made to either match existing cottage pane windows or create a cottage pane effect. Although flexible to a degree in terms of size, the openings comply with the maximum allowed by insurance companies.

Manufactured from a combination of aluminium square tubing with a reinforced steel bar through the centre for increased resistance to attack, Trellidor Cottage Guard can be used in residences as well as commercial premises. There are very few products on the market to challenge the strength of these burglar guards.

The units are fully framed, with no welding required, and are bolted into the substrate of the window with coach screws to improve their ability to repel a determined assault. They are suitable for high corrosion areas such as at the coast and are fully guaranteed. Ask your Trellidor Consultant to explain how to maintain your Trellidor Cottage Guards to ensure the validity of the full guarantee.

NEW

Trellidor Clear Guard

Trellidor Clear Guard is our unique, premium range of security doors and windows. They are a departure from our familiar trellis-style barriers and consist of an aluminium frame with a stainless steel mesh insert.

These barriers offer such clear, unobstructed views that they appear to be invisible while offering protection against unwanted intrusion. They have passed a number of critical, internationally recognised strength tests (AS 5041-2003; ASTM B117).

Designed to protect a wide range of door and window styles, Trellidor Clear Guard has proven to be durable and corrosion resistant, even in coastal conditions. They allow for free airflow, block up to 60% of the sun's harmful UV rays, and contribute to the improved energy efficiency of a building.

Apart from helping to protect homes and commercial buildings against unwanted criminal intruders, Trellidor Clear Guard also prevents pests such as monkeys, flies, mosquitoes and snakes from getting in.

As a conscientious consumer please remember that given enough time and the right tools, all security barriers can be breached no matter how well they're constructed. As a responsible manufacturer, however, we endeavour to design, engineer and install our products to give our customers the best possible security barriers the technology at the time allows.

FINANCE AVAILABLE

We're all aware of the need to secure our homes against crime. Unfortunately lack of finances often means we have to compromise, securing only selected areas or using inferior products, leaving us vulnerable to break-ins.

With the help of finance originators **Finconnect** you can apply for and structure a finance plan to make paying for your high-quality Trellidor security barriers quick, easy and affordable. You'll be able to secure your entire home immediately, leaving no defenceless areas for robbers to exploit. You choose your own investment amount and the most manageable repayment terms, extending your payments over a period that suits you.
